

FOR STANDARD CISTERN TOILETS

Reuse a plastic bottle and save water!

Do you want a quick and easy way to save a litre of water everytime you flush the toilet?

Save-flush-bags can be inserted into a standard toilet cistern. These can be ordered from

www.unitedutilities.com/SaveaFlush-orderform.htm

An ideal alternative to this supporting the theme of Reduce, Reuse and Recycle - Reuse a plastic 1 litre bottle.

Use all the contents of the bottle and rinse out.

Add a few pebbles, fill with water and replace the lid.

Place carefully in the cistern of your toilet - Ensure it does not affect the workings of the cistern.

Now everytime you flush you'll save 1 litre of water!
