

Sewer Flooding Solutions

There is a solution. This is not a problem unique to your area and we have solved this in other parts of the North West. As part of our commitment to improve the reliability of the sewer network to help prevent flooding, we propose to:

- Construct a below ground storage tank located underneath the park area off Chadwick Road, at the junction with Warmingham Lane;
- Install new larger sewer pipes in Cross Lane, Booth Lane and Warmingham Lane; and
- Construct a new sewer in the fields off Warmingham Lane.

We hope to start work in July 2009 and will be finished in May 2011.
