### Notes on this document

- Instructions in **CAPS** are for computer programming
- Instructions in *italics* are for telephone interviewers
- **Bold** or underlined words are for emphasis within a question
- Different question types have different numbers:
  - Screener questions are labelled S01, S02, S03 etc.
  - Main survey questions are labelled Q01, Q02, Q03 etc.
  - Further demographic / classification questions are labelled C01, C02, C03 etc.
  - Number codes are included on each question for data processing purposes

## Questionnaire quality checklist

Please use this list to check your script before it is sent to data for set up. Speak to your PM if you are unsure about any of these checks.

	Are quotas or sampling requirements clearly specified?	
Labelling	Is the script labelled with the client name, job, project code and version?	
	Do all questions have a unique number?	
	Are all questions numbered consistently with proper conventions for screener (S0X) and classification (C0X) questions?	
	Have all information pages been entered correctly as 'INFO1', 'INFO2'...	
	Have all notes to data (which aren't questions) been entered onto one line starting with 'DP NOTE: '?	
	Is each question to one of the specified question types? (See 'labelling_questionnaire.xls' in your project file if you aren't sure).	
	Have all grid questions been entered into separate tables with the grid label (column) first then a separate table for grid item (row)?	
Routing, ordering	Does each question have a base description which begins 'Base: '?	
	Are routing instructions easy to understand, do they reference the correct questions earlier in the survey?	
	Are exclusive and fixed codes identified where necessary?	
	Are answer lists ordered or randomized appropriately?	
Language	Is the phrasing of each question complete, simple and easily read on screen and aloud?	
	Is the phrasing of each question appropriate for its delivery mode (self-completion or interviewer led)?	
	Do the answer codes of closed questions relate directly to the question?	
NR	Have options for 'other, don't know etc.' been deployed appropriately?	
	Do all sensitive or personal questions include 'Prefer not to say'?	
Code labels	Are answer options coded correctly (Unique, sequential order 1~79)	
	Are all DK/PNTS options coded correctly? (80~99) <ul style="list-style-type: none"> <li>• Other (80 - 82)</li> <li>• Don't know (85)</li> <li>• Prefer not to say / refused (86)</li> <li>• None of the above / not applicable (87)</li> <li>• Can't remember (88)</li> <li>• Not stated / not answered (89)</li> </ul>	
Quality	Does this survey require any of the following? Include if appropriate <ul style="list-style-type: none"> <li>• Contact collection for further research</li> <li>• Contact collection for interviewer validation</li> <li>• Attention or data quality check questions</li> </ul>	
<b>Have you proof-read the questionnaire for spelling and grammatical errors?</b>		

Please confirm that you have checked this script against these criteria:

## Introduction

*Thank you for agreeing to take part in this survey. This survey is being conducted by DJS Research on behalf of United Utilities who provide water and wastewater services to the North West of England. They would like to hear from customers to understand more about their views on how best to manage wastewater in the future.*

We would really appreciate it if you could spare 20 minutes of your time to give your feedback which will be used to inform United Utilities' future plans.

DJS Research is a Market Research Society partner and as such we operate in accordance with their Code of Conduct, which guarantees anonymity and there would be strictly no sales or other contact resulting from doing this survey.

## DRAINAGE INVESTMENT LEVELS TRADE OFF

### INFO2

#### Base: All respondents

Wastewater, whether it comes from flushing the toilet or from rain falling onto roofs and roads, needs to be collected, treated, and sent safely back to the environment.

However, going forward the North West faces the following challenges in how wastewater is managed:

- **A changing climate** – this is causing drier summers, which is affecting our water supplies, while the frequency of heavy rainfall and storms is also predicted to increase, which could result in more flooding and more spills from sewer overflows.
- **More extreme weather events** – more rainfall and drought will put extra pressure on the sewer system.
- **A growing population** – more people means there will be more wastewater to manage.
- **Urban development** – gardens and other green spaces are often built on or paved over increasing the amount and speed of rainwater running off roofs and roads into sewers. This can cause a higher frequency and volume of spills and flooding.
- **Structural failures** – sewers and pipes may collapse due to their state of repair, causing flooding and a disruption to service.
- **Blockages** – sewers can also become blocked from flushing the wrong things down toilets and disposing of fats and oils down sinks and drains.

To deal with these challenges, United Utilities is consulting experts, stakeholders and customers to develop a 25-year Drainage and Wastewater Management Plan (DWMP).

This plan assesses the effects of future pressures on our wastewater systems over the short, medium and long term, and what can be done to address these issues. The DWMP will play a big part in how United Utilities works in the coming years, as it will influence their future business plans to make sure that they are doing the right thing for the region both now and in the long term.

## INFO2a

### Have your say

United Utilities has already tested a draft version of its Drainage and Wastewater Management Plan (DWMP) with customers and stakeholders and has made improvements to it based on the feedback they received. Now, United Utilities would like to get your opinion on its updated plan and for you to decide what level of investment you would prefer in areas of the plan that are not fixed by law. This covers the level of investment that United Utilities should put into things like:

- **Customer education** – raising awareness among customers and future generations about the challenges our wastewater systems face and how to change behaviours.
- **Intelligent sewers** – using real-time data and artificial intelligence to monitor 78,000km of sewers, to identify issues and blockages more quickly and be proactive in responding to issues before they occur.
- **Sewer upgrades** – repairing, upgrading, monitoring and replacing sewer pipes to prevent issues in the network.
- **Storage tanks** – making existing sewers bigger or creating large concrete tanks to store water in times of high rainfall to prevent sewer flowing or overflowing
- **Sustainable Drainage solutions** – providing areas which store water by mimicking nature, allowing more water to soak into the ground and taking pressure of the sewer system.

United Utilities has created a proposed plan based on the level of investment it thinks is best, as well as lower and higher investment options for you to choose from.

To help inform your choices, you'll see how the different levels of investment affect:

- Water bill impact
- Inside home flooding risk
- Pollution to water environment
- United Utilities' carbon footprint
- Environmental & social benefits

Please consider how important each of these factors are to you when selecting your preferred levels of investment. Also, please consider your household income and expenditure remembering that:

- Any money you pay for these improvements will not be available for you to spend elsewhere.
- Other household bills may go up or down affecting the amount of money you have to spend in general.
- Your water bill may also rise because of other factors and service improvements.
- Your household bills will also be affected by how much other costs increase each year.

## Other things to be aware of

- Water bill impact is based on the current average household water bill which is £34.75 per month. If your bill is above the average, the change that you would see in your bill would be higher. Likewise, if your bill is below the average the change in your bill would be lower.
- The bill impact shown excludes the impact of any rises in costs to goods, services and other bills (i.e. inflation).
- These bill impacts are based on the information currently available to United Utilities and is subject to change in the future.
- The bars showing the impacts are **relative** to what is achievable within the confines of variations of the plan.

*The bill impact shown excludes the impact of any rises in costs to goods, services and other bills (i.e. inflation – please click here for an explanation)*

If respondent clicks on 'what is inflation' display following text

Inflation is the rate of increase in prices for goods and services. So if inflation is 9% higher than 12 months earlier, 4 pints of milk which was £1 twelve months ago will now cost £1.09. Incomes and pensions can also rise in line with inflation which can offset the increase in cost of goods and services.
