## **Letter of support for United Utilities Green Recovery proposals**

As an organisation involved in the protection and enhancement of the environment and communities we are keen to further engage with partners to develop new initiatives that help to further these objectives.

The proposals that United Utilities would look to deliver on the Fylde Coast, including, Sustainable drainage and natural flood management to reduce flooding associated with surface water and sewers and the delivery of catchment interventions to reduce raw water pollutions from pesticides and other contaminants to rivers to improve the quality of drinking water abstracted, support agriculture and create biodiversity align with the ambitions of the Council.

Blackpool Council are pleased that a partnership approach has been taken in identifying what can be achieved and how best it can be delivered.

Blackpool Council are keen to work in partnership to align delivery and maximise the results that can be achieved and are particularly supportive of United Utilities Proposals.

Blackpool Council are supportive of these proposal and look forward to working with you in the future, to ensure delivery of these benefits for the communities of the North West.

Yours sincerely

Clare Nolan-Barnes  
Head of Coastal and Environmental Partnership Investments
